REVIEW

Where, exactly, are we?

ai-venn.png

ai-umbrella.png

Defining Terms

- ▶ [Defining some basic terms](#) check out this link for a short video on a bunch of new terms such as AI, machine learning (ML) vs Generative AI, etc.
- ▶ Large Language Model (LLM) - this is what we are all calling “AI” now. Basically like an auto-complete or [Hadoop](#) on steroids. [Introduction to Large Language Models](#)
- ▶ Here is a video that describes [Large language Models](#)
- ▶ [Agentic](#) - the use of AI agents to perform automated tasks but without human intervention. [What exactly is an AI agent? - Ron Miller - December 15, 2024](#)

Model Context Protocol

- ▶ MCP Hosts: Programs like Claude Desktop, IDEs, or AI tools that want to access data through MCP
- ▶ MCP Clients: Protocol clients that maintain 1:1 connections with servers
- ▶ MCP Servers: Lightweight programs that each expose specific capabilities through the standardized Model Context Protocol
- ▶ Local Data Sources: Your computer's files, databases, and services that MCP servers can securely access
- ▶ Remote Services: External systems available over the internet (e.g., through APIs) that MCP servers can connect to

Review of Palo Alto Networks Internal AI Use to Date

- ▶ Notebook LM
- ▶ Gemini integration with e-mail.
- ▶ Gemini Notebook Challenge is underway. This is a contest where “hundreds” of videos have been submitted about folks using large-language models in their Palo work lives.
- ▶ Panda AI
- ▶ The AI Hub is pretty cool.

What's Happening

Palo Alto Networks in the News

- ▶ CEO Nikesh Arora discusses the company's purchase of artificial intelligence security firm Protect AI

Why So Popular?

• [Log to Claude](#) [Log](#)

- ▶ Check out the [Intro to Claude](#)
- ▶ [Claude](#) is a competitor to [ChatGPT](#) and a video about [Claude vs. ChatGPT](#).
- ▶ MONEY SHOT —> [Claude Code: The Future of Coding?](#) Safeties off, You can turn it loose on your home network!
- ▶ [How to build a website using Claude 3 AI with an AI chat box for visitors to use](#) a “no code” demonstration that should be fun and easy to check out the core concepts.

- ▶ Let's [take a quick look at Ollama together](#). I consider this the “hacker path”, where the nerds and experimenters live and work.
- ▶ Ollama uses your computer's GPU to speed up it's work. It can still run your Model if there is no GPU present, but at a much slower rate.
- ▶ Let's check out the Modelfile that Gemini created for me to use in Ollama.

logo_ollama.png

palo-head

- ▶ 1. The “FROM” line tells you what model to use.
- ▶ 2. The “PARAMETER” line.
- ▶ 3. The “SYSTEM” line is the “personality”.

ollama-modelfile1.png

Tips from Usama

- ▶ Internal AI System, use chat.pan.dev if you need to run AI LLM against customer data.
- ▶ NEVER NEVER PUT CUSTOMER DATA INTO A RANDOM LLM. Be sure to use the Palo Alto Networks approved tools and ways of working as outlined by our management.
- ▶ [The AI page at pan.dev](#)
- ▶ There is a Slack announcement channel called #ai-tips that you may find interesting.

Exercise caution and common sense

- ▶ This may, hopefully, sound odd to you.
- ▶ People are Falling in Love with \$300 Ai Chatbots
- ▶ Why people are falling in love with A.I. companions
- ▶ God and robots: Will AI transform religion? - BBC News

Google tools: Gemini and Notebook LM

- ▶ Internal use only AI tools from Google are now available.
- ▶ [The AI powered productivity page](#) explains the rules around handling (customer) data, how the new official tools work, and more.
- ▶ Internal panopto video that answers many, many questions.
[Gemini and Notebook LM 2.0](#)
- ▶ Check out [the tooltime channel on Slack](#).

Performance Review Gem

- ▶ You can use a "gem" to pre-configure a Gemini prompt to assist you with your yearly performance review.

Using AI with Gmail

- ▶ We did a quick live demonstration during the team meeting on June 24th, 2025
- ▶ If you would like to see it again or have questions please reach out.

Google: NotebookLM

Choose a new notebook in NotebookLM when you're conducting research, learning a new topic, or trying to make sense of a large amount of information. NotebookLM excels at synthesizing information from multiple sources and providing you with a deeper understanding of your subject matter.

Google: Gemini Custom Gems

Choose a custom Gem when you have a recurring task that you want to automate or personalize. Gems are all about efficiency and consistency, allowing you to create a tailored AI assistant that understands your unique needs.

LAGNIAPPE

Panda AI

- ▶ Let's take a quick look at Panda AI together.
